LÍNEA DE VIDA VERTICAL SECUROPE EVO Y ANTICAIDAS ZIP

Code N° ASSY SECU VERTICAL 001

June 2015

DESCRIPTION

The SecuRope Vertical EVO lifeline is designed to be permanently installed on ladders where maintenance workers are exposed to a risk of falling when performing their work.

The SecuRope Vertical lifeline system incorporates one energy absorbing device which limits loads to 6 kN in the event of a fall. This allows the system to be mounted on relatively fragile structures like aluminum ladders.

The SecuRope Vertical EVO lifeline is designed to protect 1 worker attached to the line. The worker must have a harness equipped with a sternal anchor point; the worker connect himself on the lifeline via a fall arrester and a karabiner.

TECHNICAL SPECIFICATION

Comes with an installer and user manual.
Material: AISI316

Compliant with EN353-1:2002
CE conformity number
0082/1084/160
MADE IN EU

Test certificate n°AT6495104

Fall arrester with absorber ZIP NSV009

Code N°	Weight	Description	Availability
NSV017	2,3 Kg	Bracket for fixing EVO anchor on rungs	Available from stock
NSV016	0,19 Kg	EVO intermediate anchor SS316	Available from stock
LDV006	0,3 Kg	Cable diameter 8 mm SS316	Available from stock
LDV038	0,275 Kg	Turnbuckle	Available from stock
LDV008	0,061 Kg	Crimping ring length 100 mm	Available from stock
NSV009	0,642 Kg	Zip! Vertical Fall arrester with absorber	Available from stock
LDV007	0,049 Kg	Warning plate in English	Available from stock

In addition to the Securope Vertical lifeline, a full body harness with sternal anchor point is necessary to form a complete system.
